CAPABILITIES

- **Protein agent**: developed a protein modification benchmark and built a Protein env for post-training a 300B-parameter model to improve its capabilities [12]. Also contributed to a general-purpose protein foundation model [11].
- **Generative modeling over scientific data**: developed a family of generative models spanning crystals [7], MOFs [10, 8], and molecules [6], and built MoMa [9] as a materials representation model adapted for catalyst discovery [5].
- **OOD detection**: developed OOD detection methods for single-label [2], multi-label [3], unlabeled settings [4].
